

COE-758 – Digital Systems Engineering

Project 2 – Report requirements

The report for project 2 (Simple Video Game) shall include the following sections and material:

- 1) Abstract (no more than 400 words)
- 2) Introduction
- 3) System Specifications
- 4) Device description / design
 - a. Symbols
 - b. VGA Specification (as used in project)
 - c. Block diagrams
 - d. State diagrams (if any)
 - e. Process diagram
- 5) Results
 - a. Timing diagrams (must show HSync and VSync signals)
 - b. Screen captures of video game functioning, showing colors and screen design as per specification
 - c. Brief explanation of results
- 6) Conclusions
- 7) References (no references are considered academic misconduct)
- 8) Appendix with VHDL code (all blocks shall be included)

A proper formatting is required. The following is a general guidance on style and formatting that is typical of the industry:

- All pages shall be numbered
- Figures **must** be labeled, include a proper caption, and referenced properly (e.g. “Case 1 is shown in Fig. X, where it can be seen....”)
- References can be in any style (e.g. IEEE, APA, MLA, etc.), but please be consistent (all references shall follow the same style)

Additionally, the length for the report should be limited to 10~12 pages (not including the VHDL code), single spaced text.
